"GROWN IN NATURE'S OWN GREENHOUSE"

24 Years Growing and Shipping Plants

A brand New Year is here and brings us many opportunities to greet our friends and customers and to present this our 24th anniversary planting guide and catalog. It is not necessary for us to say we appreciate your business. We hope our service, our courtesousness and the quality of OMEGA BRAND plants show our appreciation more than anything we might say here.

We are proud of our 24 years as plant growers serving the entire United States. We like to think of the many customers for whom we have grown millions of plants during these past years. But you as a grower of vegetables are interested in these 24 years only as they show our experience and ability to serve you. It assures you that we can supply the best plants now.

The rainfall has been adequate and the growing season favorable and all indications point to a normal crop. The plants we offer are first class in every respect. We are proud to offer them to you under our OMEGA BRAND. Early vegetables always bring top prices and heaviest yield. Order now and plant early is always good advice.

Sincerely yours,

OMEGA PLANT FARMS, INC.,

E. L. Powell, Sec.-Treas.

OMEGA PLANT FARMS

OMEGA GEORGIA

TO THE TRADE

Your profit from vegetables this year will depend upon you getting the best quality plants. In our twenty-four years experience growing and shipping plants, we have learned where to get the best seed, how to grow and pack vegetable plants that will give satisfaction in every particular. All our plants are grown from the very best seed obtainable, upon land especially adapted to the growing of plants and in a climate of just enough sunshine and cold to grow for best quality.

We do not have a list of all varieties but devote all our energies to a small list of leaders and specialize in top notch producers of profitable crops.

We have the land, a large force of experienced men and equipment for handling plants properly and we know our service is second to none, regardless of the size of your order.

OUR GUARANTEE—Knowing that seed or plants of the highest quality will often fail through improper treatment due to several reasons, we will not be responsible for the crop. However we will refill free of charge or refund purchase price on any order of plants not entirely satisfactory provided you notify us within ten days from receipt of plants. In no case will we be responsible for any amount greater than the purchase price.

How TO ORDER PLANTS—All plants are sold on cash basis, so make remittance by postoffice or express money order, drafts or checks. This will save extra cost to you in making collections and returning money to us by postoffice and express companies. However, we will make shipments C. O. D. if you prefer them that way. **BE SURE AND STATE DATE YOU WANT SHIPMENT MADE.**

WHAT TO DO WHEN PLANTS ARRIVE

Open and take a few bundles from center of crate immediately and if weather conditions are unfavorable for transplanting to fields place in cool place, keeping roots moist and top dry or trench out thinly—keeping plenty of moisture to roots and top dry.

To better serve our trade we have three growing stations,

*Fort Meade, Fla., Omega, Ga.,
Memphis, Tenn.*

Send All Orders To Omega, Ga.

**THE QUICKEST WAY TO MAKE VEGETABLES IS TO SET
OUR OPEN FIELD GROWN PLANTS**

Frost Proof Cabbage Plants

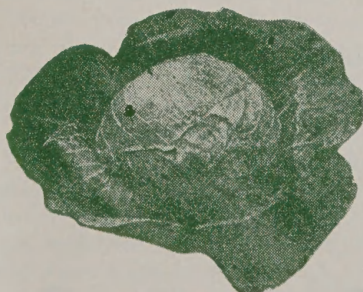

OUR FROST PROOF CABBAGE PLANTS are grown in the open fields and have been known to stand a temperature of 14 degrees above zero here without injury. They can be set much earlier than hot-bed, or cold-frame plants. The tops will not make much growth during the cold weather, but the roots will develop and have a good root system, and when the weather opens up they will make hard headed cabbage much earlier than hot-bed or home grown plants.

Early Jersey Wakefield

Charleston Wakefield

Golden Acre

Realizing that market gardeners and large commercial growers must have true to type varieties we buy only reliable seed and get these a year in advance and test a sample from each bag to be sure our plants are true to type and can assure you that you will get varieties ordered.

WE CAN SUPPLY THE FOLLOWING VARIETIES

EARLY JERSEY WAKEFIELD, 63 Days—Best early and extensively used for home and market. Firm pointed heads with few outside leaves.

CHARLESTON WAKEFIELD, 72 Days—Larger and less pointed than Early Jersey, and about ten days later.

GOLDEN ACRE, 63 Days—Earliest round head variety, little smaller than Copenhagen Market and about a week to ten days earlier.

COPENHAGEN MARKET, 72 Days—Early round headed variety, popular in all markets, very firm and of the highest quality.

EARLY ROUND DUTCH, 76 Days—An excellent early cabbage producing firm round heads and much harder than Copenhagen varieties.

GLORY OF ENKHUIZEN, 80 Days—Attractive medium early large, round and solid.

ALL SEASON, 85 Days—A desirable variety for early or late use. Very large flat heads.

EARLY FLAT DUTCH, 83 Days—Sure-heading, compact and early. Heads flattened and solid.

RED VARIETIES

ROUND RED DUTCH, 90 Days—One of the earliest Reds making firm, round, uniform heads.

MANMOTH RED ROCK, 110 Days—Heads very firm, large, round and a sure cropper.

WE SHIP CABBAGE AND COLLARD PLANTS 12 MONTHS IN THE YEAR

Yellow Resistant Cabbage

YELLOW RESISTANT CABBAGE was developed by Wisconsin Agriculture Experiment Station and cabbage can now be grown in localities where infested "Cabbage Yellows" soil prevented regular varieties from producing a crop. If you are in a section so infested we recommend the following varieties.

JERSEY QUEEN, 68 Days—An early pointed type yellow resistant strain used in place of Jersey Wakefield.

RACINE MARKET, 67 Days—Yellow Resistant.—Golden Acre type and about one week later than regular Golden Acre.

MARION MARKET, 75 Days. Yellow Resistant Copenhagen Type—About ten days later than Racine Market.

Globe, 85 Days.—Yellow Resistant Glory of ENKHUIZEN.

WISCONSIN ALL SEASON, 84 Days—One of the hardiest cabbage grown, making large flat heads and is much in demand for making kraut.

WISCONSIN HOLLANDER No. 8, 115 Days—A late yellow resistant strain of Danish Ball Head type. Splendid late for storage, shipping or kraut manufacturing.

CABBAGE OR HEADING COLLARD — Low growing compact. The loose clusters often tend to form a head.

GEORGIA OR SOUTHERN—Tall growing, producing large, light green leaves, light frost will improve the flavor.

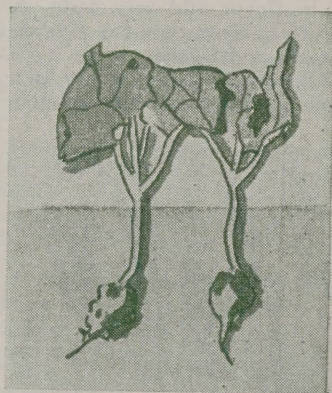

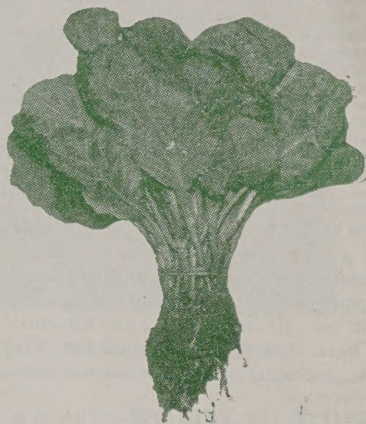

Either Variety of Cabbage or Collard Plants at The Following Prices:

A WORD ABOUT COMPETITIVE PRICES

We bought the best cabbage seed available paying double the price a number of good growers were asking for same varieties. We have cultivated, sprayed and irrigated our fields and learned years ago the best in seed or plants always cost less. Comparing quality we are never undersold.

Your Dollar Today Will Buy More Plant Value Than Any Time In Our 24 Years Growing and Shipping Plants

BERMUDA ONION PLANTS

The onion plant business has grown in this section for the past few years until today Georgia is as heavy a shipper as Texas. Our Onion plants are better because we grow onion plants for shipment only and do not set our choice plants on our farm and offer the weaker plants for sale. Onions grown from plants will keep much better than grown from sets, and you will always be glad you included onion plants with your order. Set from thirty to sixty thousand plants per acre. We can supply the following varieties.

CRYSTAL WHITE WAX—This is a very popular variety, an absolutely pure white onion of waxy appearance. The sweetest and mildest of all the Bermuda Onions. There is a good demand for this on account of its handsome appearance.

WHITE OR YELLOW—This is a straw colored variety, exceedingly mild in flavor and very early. A very profitable variety for market, gardeners and truckers.

PRIZETAKER—This variety is a famous variety all over the country

Proper Depths for
setting Onion Plants

for producing large onions. They are straw color, extremely mild flavor and good keepers.

RIVERSIDE SWEET SPANISH—Sparkling white flesh. Mild, sweet, good quality and splendid keeper.

**WHY GAMBLE WITH CHEAP PLANTS? GET THE BEST!
BUY OMEGA BRAND PLANTS**

ACTUAL PHOTOGRAPH OF OUR IRRIGATING SYSTEM

The tomato and its many by-products has always been a strong factor in supplying food for our country and in today's crisis there will be greater demand for these products, your job in our Defense Program is production and OMEGA BRAND Tomato Plants will increase your yields 20%.

For the past few years there has been a tremendous increase in the use of field grown tomato plants. They have proven to be more satisfactory and economical for growers in all parts of the United States. Field grown plants make heavier yields, mature earlier, and produce more number one tomatoes for both commercial and canners.

Omega Brand tomato plants are grown in the open fields in Nature's Own Greenhouse and make strong, stocky plants with a well developed root system. They are not frost proof but are much hardier, stronger and start growing much quicker than tender seedling or plants from a greenhouse.

All our tomato plants are grown from certified seed on new fields cultivated, sprayed and irrigated (when necessary) under the supervision of a full time graduate Plant Pathologist.

All plants are carefully selected in fields or graded in packing houses and only seven to ten inch plants about the size of a cedar pencil used.

Each bundle of 50 plants carefully wrapped with roots in damp moss and guaranteed to reach you in good growing condition.

DON'T TAKE CHANCES—BUY OMEGA BRAND—
BETTER PLANTS

TOMATO PLANTS

We do not have transplanted or spotted tomato plants but a number of our customers report our plants have produced larger yields than spotted plants.

Shape
of
Fruit

EARLIANA, 60 Days—One of the earliest varieties grown, making large, well rounded fruit of deep scarlet red color.

JOHN BAER, 66 Days—Medium to large, round, scarlet-red fruit, smooth and firm. A good early variety.

BONNY BEST, 66 Days—A very popular early tomato for home and market. Scarlet-red fruit, flattened globe shape, vigorous grower with plenty of foliage.

PRITCHARD (SCARLET TOPPER), 70 Days—An ideal all-purpose tomato, wilt resistant, large producer of bright red globe shape, medium size and excellent quality.

STOKESDALE, 70 Days—A new variety developed by Francis C. Stokes. Early heavy yielder, deep red, globe shape, gaining in popularity with commercial shippers and canners.

RUTGER, 74 Days—A wilt resistant variety, vigorous grower with plenty of foliage, fruit globular shaped, bright red with heavy walls, small cells, a popular variety all over the United States.

JUNE PINK, 60 Days—Early maturing, large, attractive, bright, deep pink skin. Very firm solid meats.

MARGLOBE, 73 Days—This variety is recommended for its resistance to wilt and nail head rust. Fruits are medium size, smooth, red and globular shape. It is a good second early and continues to bear until frost.

MASTER MARGLOBE, 73 Days—The finest strain of Marglobe bred to produce heavy yields, perfectly shaped fruits.

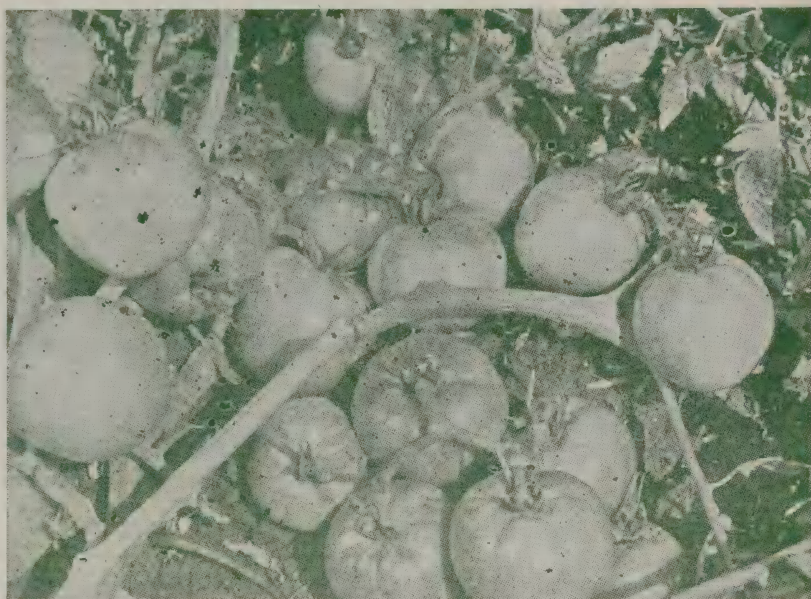

GREATER BALTIMORE 78 Days—This variety is excellent for canning. Producing a large, solid, smooth fruit of bright red color and excellent quality.

INDIANA BALTIMORE, 75 Days—A select strain of Greater Baltimore preferred thru the middle west.

TOMATO PLANTS ARE NOT FROST PROOF

The 1939 report of the New Jersey Ten Ton Tomato Club shows the three winners in largest yield per acre and the three highest quality winners all used southern grown plants. Commercial growers and market gardeners report that our plants have given them earlier, larger yields of number one tomatoes.

OMEGA BRAND PLANTS ARE BETTER

OMEGA BRAND FIELD GROWN PLANTS

All Pepper Plants are open field grown, but are not frost-proof. Plants may be set in open earlier than hot-house plants, as they are hardened by March winds and have been known to withstand light frost.

SWEET VARIETIES

WORLD BEATERS—One of the best of the larger peppers, fruits 5 inches long, 3 inches in diameter. Flesh mild and thick, deep red when ripe. Good shipper and very productive.

RUBY KING—Excellent for home, market, garden and shipping. About as large as World Beater, vigorous grower, very profitable. Deep green becoming bright red, mild, sweet, thick flesh.

PIMENTO—A small, mild pepper, glossy green when young, ruby red when ripe, excellent for stuffing and canning.

CALIFORNIA WONDER—This is a large thick meated sweet pepper which we recommend above all others. Vigorous growing plants making heavy yield of large blocky fruit 5 inches long and 4 inches wide.

HOT VARIETIES

LONG RED CEYENE—This medium early pepper is long slender pointed, deep green when young and bright red when ripe, strong flesh and pungent.

HUNGARIAN YELLOW WAX—This early variety is larger than other hot peppers producing fruits 6 to 7 inches long and 2 inches in diameter. Excellent for canning. The color is waxy light yellow at first changing to orange and then to bright red.

SEED CORN

HASTINGS PROLIFFIC— The seed we offer you was grown from seed purchased from H. C. Hastings Co., last season and is what we believe to be the best variety for the South. It is a late season corn maturing in 125 days. Stalks 8 to 12 feet tall, making from 2 to 7 medium size ears to the stalk.

BY MAIL OR EXPRESS—

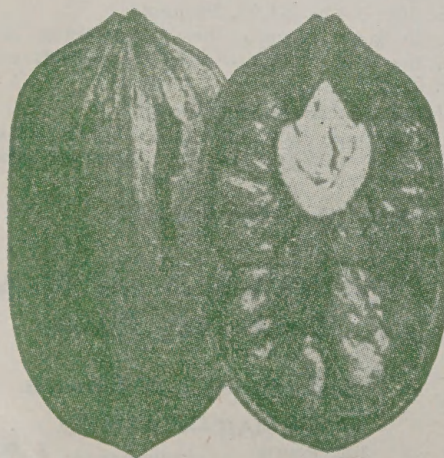

CHARGES COLLECT

5 Lbs. 50c; 14 Lbs. (1 peck) 75c;

56 Lbs. (1 bu.) \$2.50

Frank Powell, president of our company and 1940 Colquitt County champion corn grower shown standing in his 10 acre field which averaged 86½ bushels per acre and won first prize.

This, of course, may look little to growers of the corn belt but please bear in mind the average yield per acre in this County for the past ten years was less than 12 bushels per acre.

Pecan Trees

PECANS—The only shade tree that will pay the taxes on your farm.

STUART—A heavy producer of large oblong nuts 1 1/4 to 2 inches long. Shell medium thin and brownish color. Kernel is full, plump and bright in color and is giving great satisfaction in all sections of the country.

SCHLEY—Medium to large size, thin shell, light reddish brown color with full kernel of rich nutty flavor.

SUCCESS—Large size, oblong and reddish brown. Full plump kernels of excellent flavor. Three foot trees of above varieties:
